Washington, D. C.

Entered at the Postaglice in Washington as second Tuesday, June 26, 1883.

THE Syracuse Herald has a good word to

say for the much berated mosquito. It re-gards the bites of that lively insect as an excellent substitute for quinine. THE wheat harvest of the Valley of Virginia is at hand. The yield is very large the grains being plumper and sounder than for years. Rockingbam County alone will have a million bushels. No need to go to

Dakota or Manitoba to raise wheat. COLONEL FARINHOLT, of Essex County, Va., abandoned the traditions of that chivalric land and went hunting for a blacksmith with a five-pound weight instead of a double-barrelled shot-gun. The result was that the blacksmith brained the Colonel with a sledge hammer.

Ture June floods of the Missouri and its tributaries are causing exceedingly high water in the Mississippi. The American bottom has been flooded, and great damage done to farms and crops, the farmers flee ing with what effects they could carry to The waters are still rising and much more damage will likely ensue.

A PRETTY instance of the brotherly love which exists between men in the same trade is seen in the following: A. C. Hesing, a German editor and sometime "Boss" o Chicago, was caught in the whisky frauds and the Government recovered a judgment against him for \$80,000. It can't be collected of course, any more than the one against Tom Ochiltree, and, like the warmhaired Southron, "Boss" Hesing proposed a nominal compromise of \$2,250. Before it could be accepted one Michaelis, a rival German editor, offered the Secretary of the Treasury \$10,000 for the judgment. This will probably be accepted unless Hesipy raises Michaelis out.

THE state of affairs existing in the Department of Justice as depicted by Senator Voorhees yesterday, in his speech in court against continuing Hallet Kilbourn's case is an outrage at once on the people who pay the taxes that keep the Government alive and those private citizens who are so unfortunate as to have business be-fore a court where the opposite side is represented by the Department of Justice. With an Attorney-General and seventeen Assistants, a District-Attorney and two Assistants in this District, that Department still had to beg for a continuance of the Kilbourn case. These officials absorb salaries reaching \$80,000 a year, and yet the Department of Justice is compelled to go outside of these twenty-one legal lights to find lawyers competent to try a case as simple as the Kilbourn one has been made by the decisions of the higher courts. As the elequent Senator said, the people are

THE steamer Furnessia, of the Auchor line, arrived at New York yesterday with 500 steerage passengers on board, twothirds of whom are paupers, sent here from Ireland by the British Government. Some of them, whole families, were taken from workhouses, in which they had been inmates for long periods ; in one instance for

twelve years.
Our authorities should take prompt and stern measures to prevent this assisted omigration. It is a double outrage, for England first makes paupers of the Irish people by infamous and oppressive laws, and then compels the miserable creatures to abandon their native land and seek, friendless, penniless and helpless, refuge on our shores. And while we pity these unfortunate creatures deeply, we cannot, in self-protection England to unload her paupers on us.

The help the English authorities extend to these poor people is meagre. The sums lar unfortunates were very small, indeed ranging from ten shillings to seven pounds, according to the size of the families. And the brutal authorities who had induced them to emigrate added insult to injury by pretending to provide them with railway tickets from New York to their destinations. Samples of this sneaking fraud are these: Mary Lynch and daughter wanted to go to Chicago where they thought they had friends. The brute who represented England had supplied her with a ticket for Nerwich, Conn. Joe Sullivan, with his wife and five children, wished to go to Cin-cinnati. The ticket given him by England's representative was for Holyoke, Mass. There were other like cases.

Prompt action is imperatively demanded

in this matter.

The Duty of the Period. It is the last feather that breaks the ack of the camel. Human patience will endure much and long, but the time can be reached when it ceases to be a virtue. It was so with the British colonists in Ameri ca more than a century ago. They stood the affronts and oppressions of the mother country until they were pressed upon them to a point beyond endurance, and they de-clared their independence from the rule of the crown of England. There is some analogy between the present condition the people of the District Columbia and that of our forefathers in the days of English op-pression of its American colonists. We deprived of the right of suffrage and of self-government by our own rulers under a pretended republican form of government, which among its fundamental principles declares that there shall be no taxation without representation. It is not that we propose or counsel armed revolution to secure our rights, but THE CRITIC with the best abilities at its command, does propose to agitate this question of anffrage and self-government until Congress shall repeal existing laws and bestow upon this people the right to vote for their own local rulers and to be represent-

ed in Congress, It is an outrage upon this people to disfranchise them and allow them no voice in making the laws which they are called upon to obey, and to impose taxation upon them without a recognition of the right of representation. It is an offense against an intelligent population of nearly 200,000 souls to rule them by a commission, appointed without the slightest regard and respect for the popular wish through the

arbitrary action of an Executive and Sen ate, wherein the ruled are in no degree represented. It is an insult to the people of Washington to deny them the right of electing their own municipal officers, so long as every other city in the United States is secured in that right. It is an unjust and offensive distinction which must be promptly removed, unless the Congress of the United States is ready to sanc-tion and continue a grievous wrong, which

we cannot believe it will do much longer. The people of this city have a right to complain of the treatment they have received at the hands of the appointing power in the appointment of a successor of Mr. Tullock as Postmaster. While we have nothing to say against the personal qualifications and fitness of the appointee, we do say that Colonel Parker was not eligible at the time of his appointment under the statutes, which declares that a Postmaster of this class must reside within the limits of the delivery of his office, for the reason that he is a citizen of the State of New York, and as his family resides in that State, and he votes there, and did not at the time of his appointment reside in this city. It is cuscomary in such cases to consult the wishes of the people interested in regard to a se lection of Postmaster, but in this case the popular wish was forestalled, and the ap-pointment was made with indecent haste,

and before the proferences of this people could possibly be consulted. This is the spirit in which the people of the city of Washington are ruled at present, and they will continue so to be ruled, until they emphatically declare for selfgovernment. No other city in the United States is subjected to such indignities as are heaped upon the people of the District of Columbia, and, under the circumstances they would be justified by the sentiment of the country if they should suspend the payment of taxes until the rights of suffrage, representation in Congress and self-government shall be restored to them. We would not counsel such action until every other effort to secure redress had failed, but the time may come when we shall feel called upon to admonish the people to resist taxation until repre-sentation is secured, and the fundamental principles of a republican form of govern-ment are respected by our rulers.

THE CRITIC ABROAD.

John G. Thompson made up his mind last night to talk. He was met by the Critic at an up-town hotel last night, when conversation was engaged in in relation to the nomination of Judge Hoadly by the

a conversation was engaged in in relation to the nomination of Judge Hoadly by the Democrats.

Mr. Thompson said: "I have just given Major Shanklin, of the Cincinnati NewsJournal, my views pretty fully on that subject. I said to him that Hoadly's nomination, viewed from the point of expediency only, was the strongest that could have been made, because it united all factions. There was no excuse for any faction within the party opposing him, and as a matter of fact the party would be a unit for him; the campaign would be the most enthusiastic and vigorously prosecuted of any that has occurred in the State in twenty years, and Hoadly will undoubtedly be elected."

"But they say you were sowned."

"Well," said Mr. Thompson, "I was left off the committee after a fifteen-years fight against me. In fact, any man who has been chairman of the State committee as long as I have been must necessarily have aroused jealousies and envy. But," and here Mr. Thompson smiled serenely, "the only man downed in that convention was John McLean. I think you will find that there are no two opinions about that. Of course, too, he will do everything he can in a sneaking way to defeat the ticket. But he will fail in that as conspicuously as he failed in the convention."

"How about the ticket?"

But he will fall in that as conspicuously as he failed in the convention."

"How about the ticket?"

"Judge Thurman properly characterized it when he said there is not a single weak feature about it, and, by the way, every man on it is my personal friend."

"Is the organization of the committee hoatile to Judge Hoadly?"

"No. Why the chairman, Mr. Page, is an intimate personal friend of Hoadly's, while the chairman of the Executive Committee, although a Ward man, is one of that kind of Democrats who count individuals as nothing where the good of the party is concerned."

concerned."

"The committee will pull together then?"
"Beyond question. All factions are represented on the committee and will work for the success of the ticket. There will be no room for bickering and fault-finding from the people, because all opinions and personal preferences have a voice in the preferences have a voice in the

"Will you take any part in the work of

"Will you take any part in the work of the campaign?"

"I shall work much harder than I have ever done, for the reason, that being relieved of the responsibilities of former years, I shall have more time to give to the details of the canvass."

"You are not a sorehead then?"

"You are not a sorehead then?"

"Not in the least, and I don't know of any soreheads anywhere within the party, with the single exception of the pitiable little malcontent of the Enquirer."

"It has been suggested," said the Critic, "that in the event of Hoadly's election he would be a very formidable candidate in the next National Democratic convention for the nomination for President."

"Oh, yes; but that would have been said about either one of the others. Judge Hoadly is a very strong man, and if he is elected, which I firmly believe he will be, the party may come to the conclusion to

the party may come to the conclusion to push his claims for Presidential honors, though he is at this time making the race

though he is at this time making the race for Governor only."

"Mr. Thompson, is it not a fact that the vote at the last election was about 150,000 short of that of 1880?"

"Yes, sir, it is."

"About what per cent. of them do you think were Republicans?"

"Well, I should think a majority of them were Republicans, but a majority of them who go to the polls this fall will vote for Headiy. I tell you, the German element in Chio have made up their minds to vote the Democratic ticket." Closing Out.

Closing Out.

To make room for an increased stock of drygoods, made necessary by their steadily increasing trade, Guinnip's, the enterprising merchants of Seventh street, are closing out their entire stock of boots and shoes at cost price. As they are composed exclusively of the celebrated make of Edwin C. Burt, they anticipate a short and quick sale. They have also included in the sale a large stock of hand and traveling satchels at cost, which come in very handy for a good many people at this season of the year. Baseball.

Baseball games were played resterday as Baseball games were played jesterday as follows:

Al Providence - Providence, 12: New York,
3. At Buffalo - Buffalo, 2: Detroit, O. Al Boston - Boston, 15: Philadeiphia, 7. At Cincinnati- Allegheny, 2: Cincinnati, 1. At Louisstille - Metropulitan, 6: Felipse, 1. At St.
Louis - St. Louis, 4: Baltimore, 2. At Reading, Pa. - Attwe, 7: Merritt, 20: eight innings.
At Fottsville, Fa. Authracite, 8: Trenton, 3. At
Columbus - Attiecte, 3: Columbus, 2. The
game was called as the end of the seventh inning on account of rain.

Fits, Fits, Fits, successfully treated by World's Dispensary Medical Association. Address with stamp for pamphlet, Buffalo, N. Y.

Charles French, of Indians, wished that he might be struck dead if he was lying, and he suddenly keeled over. He was lying like a tinker, and what alled him was getting a gold place stuck fast in his throat. Lewisville, IND.—Rev. J. S. Cain says used Brown's Iron Bitters for nervous tration and found it entirely eatisfactory.

RE-INVESTIGATED.

A Remarkable Statement Fully Con-firmed by Three Important Inter-

firmed by Three Important Inter-views.
An unusual article from the Rochester (N.

An unusual article from the Rochester (N. Y.) Democrat and Chronicle was published in this paper recently and has been the subject of much conversation, both in professional circles and on the street. Apparently it caused more commotion in Rochester, as the following from the same paper shows:

Dr. J. B. Henion, who is well-known not only in Rochester, but in nearly every part of America, sent an extended article to this paper a few days aince, which was duly published, detailing his remarkable experience and rescue from what seemed to be certain death. It would be impossible to enumerate the personal inquiries which have been made at our office as to the validity of the article, but they have been so numerous that further investigation of the subject was deemed an editorial necessity.

With this end in view a representative of

have been so numerous that further investigation of the subject was deemed an editorial
necessity.

With this end in view a representative of
this paper called on Dr. Henlon at his residence, when the following interview occurred:

"That article of yours, dector, has created
quite a whirlyind. Are the statements about
the terrible condition you were in, and the
way you were rescued such as you can sustain?"

"Every one of them and many additional
ones. Few people ever get so near the grave
as I did and then return, and i am not surprised that the public think it marvelous. It
was marvelous."

"How in the world did you, a physician,
come to be brought so low?"

"By neglecting the first and most simple
symptoms. I did not think it was sick. It is
true I had frequent headaches; felt tired most
of the time; could eat nothing one day and was
ravenous the next; felt dull, indefinite pains,
and my stomach was out of order, but I did
not think it meant anything serious."

"But have these common aliments anything
to do with the fearful Bright's disease which
took so firm a hold on you?"

"Anything? Why, they are the sure indications of the first snages of that dreadful maisdy.
The fact is, few people know or realize what
alia them, and I am sorry to say that too few
physicians do either."

"That is a strange statement, doctor,"

The fact is, few people know or realize what alls them, and I am sorry to say that too few physicians do either."

"That it is a true one. The medical profession have been treating symptoms instead of diseases for years, and it is high time it coased. We docters have been clipping off the twigs when we should strike at the root. The symptoms I have just monthoned or any unusual action or irritation of the water channels indicate the approach of Bright's disease even more than a cough announces the coming of consumption. We do not treat the cough, but try to help the lungs. We should not waste our time trying to relieve the head-ache, stomach, pains about the body or other symptoms, but go directly to the kidnoys, the source of much of these allments."

"This, then, is what you meant when you said more than one-half the deaths which occur arise from Bright's disease, is it dector?"

"Precisely. Thousands of so-called discases afte torturing people to-day, when in reality it is Bright's disease in some one of its many forms. It is a bydra-headed monster and the slightest symptoms should strike terror to every one who has them. I can look back and recall hundreds of deaths which physicians declared at the time were caused by paralysis, apoplexy, heart disease, panumonia, malarial fover and other common complaints which I see now were caused by Bright's disease."

monis, malarial fover and other common com-plaints which I see now were caused by Bright's disease."

"And did all these cases have simple symp-

Bright's disease."

"And did all these cases have simple symptoms at first?"

"Every one of them, and might have been cured as I was by the timely use of the same remedy—Warner's Safe Cure. I am getting my eyes fairly open in this matter and think I am helping others to see the facts and their possible danger also. Why, there are no end of truths bearing on this subject. If you want of truths bearing on this subject. If you want of truths bearing on this subject and can give promised. He was sick the same as I, and is the healthlest man it facts and can give you more facts than I can. Go, too, and see Dr. Latitmore, the chemist, at the university. If you want facts there are any quantity of them showing the alarming increase of Bright's disease, its simple and deceptive symptoms, and there is but one way by which it can be escaped.

Fully satisfied of the truth and force of the Doctor's words, the reporter bid him good day and called on Mr. Warner at his establishment on Exchange street. At first Mr. Warner was inclined to be reticent, but learning that the information desired was about the alarming increase of Bright's disease, his manuer hanged instantly and he spoke very sarnestly:
"It is true that Bright's disease has in-

his manner changed instantly and he spoke very earnestly;

"It is true that Bright's disease has increased wonderfully, and we find, by reliable stallastics, that in the past ten years its growth has been 250 percent. Look at the prominent men it has carried off: Everett, Sunner, Chase, Wilson, Carpenter, Bishops Haven and Peck, and others. This is terrible, and shows a greater growth than that of any other known complaint. It should be plain to every one that something must be done to check this increase or there is no knowing where it may end."

"Do you think many people are afficient with it to day when do not realize it. Mr. Wet.

"Do you think many people are afflicted with it to-day who do not realize it. Mr. Warner?"
"Hundreds of thousands. I have a striking example of this truth which has just come to my notice. A prominent professor in a New Orleans medical college was lecturing before his class on the subject of Bright's disease. He had various fluids under microscopic analysis, and was showing the students what the indications of this terrible malady were. In order to show the contrast between healthy and unhealthy fluids, he had provided a vial, the contents of which were drawn from his own person. 'And now, gentlemen,' he said, 'as we have seen the unhealthy indications, I will show you how it appears in a state of perfect health,' and he submitted his own fluid to the usual test. As he watched the results his countenance suddenly changed—his color and command both left him, and in a trembling voice he said: 'Gentlemen, I have made a painful discovery; I have Bright's disease of the kidneys,' and in less than a year he was dead."
"You believe, then, that it has no symptoms of its own and is frequently unknown even by the person who is afflicted with it!"
"If has no symptoms of its own and very often none at all. Usually no two people have the same symptoms, and frequently death is

often none at all. Usually no two people have
the same symptoms, and frequently death is
the first symptom. The slightest indication
of any kidney difficulty should be enough to
strike terror to any one. I know what I am
talking about, for I have been through all the
stages of kidney disense.

"You know of Dr. Henion's case?"
"You know of Dr. Henion's case?"
"Itel, I have both read and heard of it."
"Itel, I have both read and heard of it."
"A very prominent case, but no more so than
a great many others that have come to my notice as having been cured by the same means."
"You believe, then, that Bright's disease can
be cured.?"

"You believe, then, that Bright's disease can be cured?"

"I know it can. I know it from the experi-ence of hundreds of prominent persons who were given up to die by both their physicians and friends."

"You speak of your own experience, what was it?"

and friends.

"You speak of your own experience, what was it?"

"A fearful one. I had felt languid and unfitted for business for years. But I did not know what alled me. When, however, I found it was kidney difficulty, I thought there was little hope, and so did the doctors. I have since learned that one of the physicians of this city pointed me out to a gentleman on the street one day, saying: 'There goes a man who will be dead within a year.' I believe his words would have proven true if I had not fortunately secured and used the remedy now known as Warner's Safe Cure.

"And this caused me to investigate. I went to the principal cities, saw the physicians precibing and using it, and I therefore deformined, as a duty I owed humanity and the suffering, to bring it within their reach, and now it is known in every part of America; is cold in every drug store, and has become a household necessity."

The reporter left Mr. Warner, much impressed with the carnestness and slucerity of Hs statemonts, and next paid a visit to Dr. S. A. Lattimore at his residence on Prines street. Pr. Lattimore at his residence on Prines street. Or. Lattimore at his residence on of the analysis, of Health, of which he is one of the analysis, of Health, of which he is one of the analysis, of Health, of which he is one of the analysis of Health, of which he is one of the analysis of the case of Mr. H. Warner some three years and December 1 analysis of the case of Mr. H. Warner some three years and December 1 analysis of the case of Mr. H. Warner some three years and December 1 analysis of the case of Mr. H. Warner some three years and December 1 analysis of the case of Mr. H. Warner some three years are the case of Mr. H. Warner some three years are the case of Mr. H. Warner some three years are the case of Mr. H. Warner some three years are the case of Mr. H. Warner some three years are the case of Mr. H. Warner some three years are the case of Mr. H. Warner some three years are the case of Mr. H. Warner some three years are the case of M

case of Mr. H. H. Warner some three years ago. Doctor?

"Yes, sir."

"What did this analysis show you?"

"The presence of albumon and tate casts in great abundance."

"And what did the symptoms indicate?"

"An earlous disease of the kidneys."

"Did you think Mr. Warner could recover?"

"No, sir. I did not think it possible. It was seldom, indeed, that so pronunced a case had, up to that time, ever been cared."

"Do you know anything about the remedy which cured him?"

"Yes, I have chemically analyzed it, and upon a critical examication, dnd it entirely free from any poisonous or deleterious substances."

free from any poleonous or deservous substances.

We publish the foregoing statements in view of the commotion which the publicity of Dr. Henion's article has caused and to meet the protestations which have been made. The standing of Dr. Henion, Mr. Warner and Dr. Lattimore in the community is beyond question and the statements they make cannot for a moment be doubted. They conclusively show that Bright's disease of the kidneys is one of the most deceptive and dangerous of all diseases, that it is exceedingly common, alarmingly increasing and that it can be cured.

A letter recently registered at the postomer.

I Evansville, Minc., was addressed as follows: "Arthur President of the U S A Waang ton Capatodum. From August Peterson."

A wood-chopper called Billy Pinter,
Was badly cut up by a splinter;
All his hurts, they did yield,
For St. Jacob's Oil healed,
And he made a big pile that winter.
